Sustainability Accounting Standards Board (SASB) Index

The index below was developed from two SASB standards that are most relevant to our business: Oil & Gas — Midstream (MD) and Oil & Gas — Refining & Marketing (RM). As we are a pure-play LNG company, many of the indicators in these two standards are not applicable to our business. We are reporting against select relevant environmental, social and governance (ESG) indicators and will work to expand our reporting on applicable indicators in future reports.
