Mr. G. David Banks
Special Assistant to the President for International Energy and Environment
The White House
1600 Pennsylvania Avenue NW
Washington, DC 20500

Dear David,

Cheniere Energy, Inc. is the first American company to export domestically manufactured liquefied natural gas (LNG) from the lower 48 states in more than 50 years. Cheniere exported its first LNG cargo in February 2016 from our facility in Sabine Pass, Louisiana, signaling a new era in global energy markets.

Cheniere's liquefaction projects in Louisiana and Corpus Christi, Texas are some of the largest construction projects in the United States, representing an investment of approximately \$30 billion in domestic energy infrastructure. Cheniere has nearly 1,000 employees and has created more than 8,000 jobs during construction at our two facilities. In addition to our direct employment, Cheniere indirectly creates tens of thousands of jobs across America through nearly 60 manufacturers in 26 states and, as one of the largest buyers of natural gas in the United States, the promotion of domestic energy production.

There is a global shift to use natural gas in power generation to reduce carbon emissions and traditional air pollution. Cheniere believes the 2015 Paris Agreement under the United Nations Framework Convention on Climate Change is a useful instrument for fostering demand for America's energy resources and supporting the continued growth of American industry.

After more than a year of selling U.S. manufactured LNG to more than 19 countries across the world, Cheniere firmly believes that domestic energy companies are better positioned to compete globally if the United States remains a party to the Paris Agreement. The United States can leverage competitive advantages in natural gas and energy technology by exporting our clean and plentiful domestic resource, all while creating American jobs, developing domestic energy production and infrastructure, growing the U.S. economy, and reducing our trade deficit.

For your consideration,

A handwritten signature in blue ink, appearing to read "Anatol Feygin". The signature is fluid and cursive, written over a light blue circular stamp or watermark.
