

BUILDING STRONG RELATIONSHIPS IN OUR LOCAL COMMUNITIES

COMMUNITY ENGAGEMENT

Our local stakeholder engagement efforts aim to foster respectful, collaborative relationships. We recognize the importance of actively and responsibly managing potential concerns associated with our operations, such as localized light, noise and air pollution and increased commuter traffic, and maintain regular two-way dialogue with residents to understand and address their concerns.

Key issues and initiatives

Proactive community engagement: We engage with our local communities from the earliest planning stages through all phases of permitting, construction and operations. We conduct public safety workshops, public presentations and community open houses to inform community members about our company and operations and to understand their needs and concerns.

Cheniere Coastal Bend Community Advisory Panel:

Since 2018, we have convened a diverse CAP with over 25 members representing residents from nine communities near our Corpus Christi facility. The panel is designed as an open forum to share and receive feedback and suggestions on behalf of the community. Due to the positive impact the CAP has had on both Cheniere and the community, we began working with other companies in the region to join the forum. In 2021, the panel will transition from a Cheniere-specific group to a regional CAP involving plant managers from six companies.

Stakeholder feedback mechanisms: We have a formal stakeholder feedback mechanism for each of our LNG facilities in Louisiana and Texas and the Midship Pipeline in Oklahoma. Community members and other stakeholders can provide feedback through a range of channels including email, toll-free phone numbers, social media and websites. Once received, we follow a formal process to collect, record, investigate and respond to issues (see our 2019 CR report, [page 63](#)). In 2020, we received 30 direct community concerns or feedback related to our liquefaction facilities and mitigated, resolved or responded to 100% of concerns in accordance with our policies. In 2020, we also began

to engage with indirect feedback received from social media platforms. These concerns primarily covered issues related to traffic, air quality, flaring and local job creation. Site managers at each of our facilities work directly with local stakeholders to streamline our stakeholder engagement process and better position us to respond quickly to concerns. See our [website](#) for examples of recent community feedback received and our responses.

Tribal engagement: We respect the rights of Indigenous peoples and recognize the importance of preserving the cultural heritage of Indigenous communities and lands of historic tribal importance in proximity to our operations. Our operations in Texas and Louisiana are not located in or on designated Native American lands and none of our operations have caused resettlement of Indigenous peoples. We continue to communicate with local landowners and stakeholders during operations. For more information, see our [2019 CR Report](#).
